

AMENDMENTS TO INTERNATIONAL FUEL GAS CODE

C. The International Fuel Gas Code adopted by reference in Section 101.4.2, 2000 International Building code is hereby amended as follows:

1. Section 109 (Means of Appeal) is amended by deleting the section in its entirety and referring to section 1(A), Chapter 3, College Station Code of Ordinances.
2. Section 309.2 (Connections) is amended to delete the reference to the "*ICC Electrical Code*" and replace with the "*National Electrical Code*, as adopted and amended by the City of College Station."
3. Section 403.4.3 (Copper and brass) is amended by deleting the section in its entirety.
4. Section 403.5.2 (Copper tubing) is amended by deleting the section in its entirety.
5. Section 406.4 (Test pressure measurement) is amended by adding the following to the end of the section:

"Diaphragm gauges meeting the following requirements shall be acceptable.

Low pressure systems - [up to and including two (2) psi.] - A low pressure diaphragm gauge with a minimum dial size of three and one half inches (3 ½") with a set hand and a pressure range of not more than six (6) psi with 1/10 pound incrementation. The minimum test pressure shall not be less than five (5) psig.

Medium pressure systems - [greater than two (2) psi up to and including five (5) psi.] - A diaphragm type pressure gauge with a minimum dial size of three and one half inches (3 ½") with a set hand and a pressure range not to exceed twenty (20) psi. with a 2/10 pound incrementation. The minimum test pressure shall not be less than ten (10) psig."

6. Section 406.4.1 (Test pressure) is amended by deleting the section in its entirety and replacing with the following:

"The test pressure to be used shall be no less than twice the proposed maximum working pressure, but no less than five (5) psig, irrespective of design pressure."

7. Section 406.4.2 (Test duration) is amended by deleting the section in its entirety and replacing with the following:

"Gas piping shall withstand the required pressure test for a period of not less than ten (10) minutes without showing any drop in pressure."
